## PROFILE

Graduated as a **full-stack developer**, I specialized in front-end development after being hired at a local software house.

Passionate about coding and comfortable collaborating in a team environment after working in a startup context.

Due to my experience in the field I acquired greater autonomy and confidence managing **bug fixing** of software I worked on, while learning to maintain **clean and intelligible** code.

I have familiarized with different technologies which range from HTML, CSS, SASS, React, Vue for **front-end** to PHP, Laravel for **back-end**.

I am eager to learn and continue growing as a developer.

## EMPLOYMENT HISTORY

**Frontend developer, Company 1** City May 20XX — Nov 20XX

- Provided effective troubleshooting and bug-fixing for web applications.
- Developed sports software using **Nuxt and Vue.js**.
- Built personal company website by using **Gatsby** and **headless CMS** Storyblok.
- Worked both on pre-existing codebase and new projects.
- Gained experience with **Git, Docker and Jira** for ticket and work management.(use of **Agile** practices for software development)
- Developed on **Windows and MacOS** environments.
- Cooperated with engineering professionals both **back-end and front-end**.
